

IVPAY TOKEN

IVPAY is a utility token of the ivendPay ecosystem. It was created to ensure a smooth transfer of value across our ecosystem. The token will be integrated into our services and products as payment, reward, or discount means.

Utility token

The motivation to create it aligns with a loyalty program to stimulate the growth of the ivendPay ecosystem and its community where the IVPAY token is a means of value transfer as well as BTC, ETH, USDT etc, but instantly and at a lower cost.

IVPAY Utility features

Stake and pay commissions in IVPAY ivendPay users will be able to get up to 50% discount on all operations in the ecosystem both for B2B and B2C solutions.

B2B discount system

A 10% discount for B2B customers will be provided for token promotion

Loyalty rewards for affiliates of ivendPay Wallet and resellers of B2B products

Introducers and resellers of B2B service who hold IVPAY token will be able to get up to 20% of lifetime commissions from reselled merchants

Deflationary Model and Token Burning

Token burning involves removing a certain amount of tokens from circulation effectively reducing the total supply of tokens. This approach creates scarcity, which can drive up demand and increase the value of the remaining tokens.

B2B discount system

A 10% discount for B2B customers will be provided for token promotion

30D volume on all operations (USDT)	Balance, IVPAY	Discount for IVPAY staking	Discount if fees paid in IVPAY (IVPAY 20% off)
